

EXECUTIVE BUSINESS REPORT

Generated: 17 July 2026 15:08

Dataset: 1000 Sales Records.csv

EXECUTIVE SUMMARY

The dataset contains 1000 rows and 14 columns, with no missing values. The data provides insights into sales channels, order priorities, and revenue. The mean total revenue is 1.327322e+06, with a mean total profit of 3.912026e+05. The data also shows a mean unit price of 262.10684 and a mean unit cost of 184.96511.

BUSINESS INSIGHTS

The top region for sales is Europe, with 267 occurrences, and the top country is Cuba, with 11 occurrences. The top item type is Beverages, with 101 occurrences, and the top sales channel is Offline, with 520 occurrences. The mean units sold is 5053.988, with a standard deviation of 2901.375317. The data also shows that the mean total cost is 9.361192e+05, with a standard deviation of 1.162571e+06.

RISKS

The data shows a high standard deviation in total revenue, total cost, and total profit, indicating potential risks in sales and revenue. The high standard deviation in unit price and unit cost also indicates potential risks in pricing and cost management.

OPPORTUNITIES

The data shows opportunities for growth in the Offline sales channel, with 520 occurrences. The top item type, Beverages, also presents opportunities for growth, with 101 occurrences. The mean total profit of 3.912026e+05 indicates opportunities for increasing profitability.

RECOMMENDATIONS

Based on the data, it is recommended to focus on the Offline sales channel and the Beverages item type to increase sales and revenue. Additionally, it is recommended to manage pricing and cost effectively to minimize risks and increase profitability. Further analysis is needed to identify specific areas for improvement and to develop strategies for growth and profitability.
